

Recreation Director Bi-weekly report

April 28th

- Clay arrived and was spread onto Steinhardt
- Speed bump arrived- needs to be installed- ordered 4 signs to warn people driving through
- Softball has started
- Sub-pumps installed at pool- old sub pumps were seized. Need sub pumps in order to drain pool.
- Fields were treated with “weed & feed”
- Spine Board arrived for pool- Spine board is used if someone has a spinal injury in the pool. The board is used to keep the injured patron’s body and head from moving when taking them out of the pool. Our old spine board was old and the head pieces and straps were falling apart.
- Premier Electric came for the electrical bonding- Due to the humidity and chemicals in the Pump room electrical work needs to be done. Pete will also be installing radon fans to create a constant air flow throughout the pump room to extend the life expectancy of the metals and electrical equipment.
- Finished painting pavilion
- Ordered paint for the steps and lines in the parking lot to repaint them.
- Ordered pool paint and chlorine resistant pool caulk
 - Taking the main pool tarp off. Next steps are to drain the pool, pressure wash the pool, tile, caulk, and paint the pool.
 - Cleaned off splash pad surface. Raked leaves out of the baby pool.
 - RJR sent us a quote to open pool. The link is attached to the email. Jim from RJR informed me that I can pick and choose what I want done on the pool opening quote to reduce the price. Also reached out to Ray Palmer for a quote.
 - Ordered new probes for the ph and chlorine readers. The life expectancy for the probes are two years, and last year was the second year for all the probes
- Began interviewing new applicants for lifeguarding and cashier positions.
